

PCM5 - Functions Enable Factsheet

Upgrade your **PCM5** with enhanced smartphone integration and updated navigation, all through a **simple SD card update process**.

Compatible Vehicles

Macan (95B) (2019 onwards)

992.1 (2019 - 2021)

Cayenne (E3) (2018 - 2023)

Panamera (971) (2017 onwards)

Available Functions

1. CarPlay / Android Auto - Full Screen
2. Android Auto Enable (wired only)
3. Enable CarPlay (if not already enabled)
4. Latest Navigation Map Updates

Benefits of Our SD Card Solution

No workshop visit or hardware modification required.

Choose between receiving a pre-loaded SD card or downloading the software to your own SD card.

Simple vehicle-specific authorisation process.

PCM5 - Functions Enable Factsheet

1. CarPlay / Android Auto - Full Screen

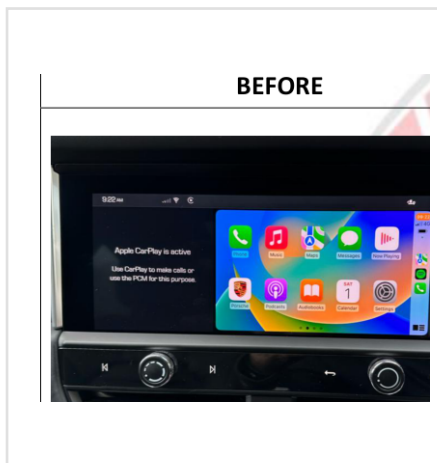

Enjoy a larger, more immersive display for Apple CarPlay and Android Auto. Choose **Windowed Full Screen** to keep the OEM top and side menus visible, or **Full Screen** to remove them. Both options are available for CarPlay and, **if Android Auto is enabled**, Android Auto.

Display Comparison

Original OEM display compared with the two enhanced layout options.

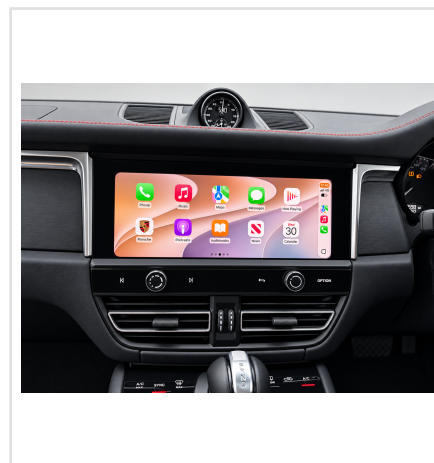

Original OEM

Windowed Full Screen

Full Screen

Windowed Full Screen retains the OEM menu bars. Full Screen maximises the available display area.

PCM5 - Functions Enable Factsheet

2. Android Auto Enable

Enable **wired Android Auto only** using a USB connection, giving access to compatible navigation, calling, messaging and media apps. Full Screen Android Auto can be enabled in either Windowed Full Screen or Full Screen mode, provided Android Auto is enabled on the PCM5.

3. Enable CarPlay

CARPLAY

Enable Apple CarPlay on your PCM5 **if not already enabled**.

4. Latest Navigation Map Updates

MAPS

Update your PCM5 navigation system with the latest available OEM maps for your region.

PCM5 - Functions Enable Factsheet

Simple SD Card Update Process

- 1.** Decide on your required options.
- 2.** Choose between receiving a pre-loaded SD card or downloading the software to your own SD card.
- 3.** Insert your SD card and send the created 'request' file to us.
- 4.** Copy our 'authorisation' file back to the SD card.
- 5.** Re-insert the SD card and the authorised functions are enabled.

PCM5 - Functions Enable Factsheet

Additional Facts

- 1.** This is an SD card update that only updates the coding on the PCM.
- 2.** The update is fully reversible as required for no additional cost.
- 3.** Whilst this is a software change only, warranty implications should always be checked with your authorised dealer.
- 4.** The supplied SD card is NOT usable in another vehicle without the required functions being authorised by us for that car.
